MP BUS

NFC

VAV-Compact unit – with VAV controller, dynamic Δp sensor and damper actuator for use with ZoneEase VAV. The VAV controller is supplied pre-addressed with MP7 so that it can be used directly with ZoneEase VAV.

• Field of application: VAV units in comfort applications
• Application: VAV/CAV
• Belimo D3, dynamic flow sensor
• Belimo M1, static diaphragm sensor
• Functional range differential pressure 0...500 Pa
• Control communicative
• Communication via Belimo MP-Bus
• Conversion of sensor signals (sensor input cannot be used with ZoneEase VAV)
• Tool connection: Service socket, NFC interface

Technical data

Safety notes

⚠

- The device must not be used outside the specified field of application, especially not in aircraft or in any other airborne means of transport.
- Outdoor application: only possible in case that no (sea) water, snow, ice, insolation or aggressive gases interfere directly with the device and that it is ensured that the ambient conditions remain within the thresholds according to the data sheet at any time.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied with during installation.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- Cables must not be removed from the device.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.

Product features

Application

The VAV-Compact unit is used for comfort applications for pressure-independent control of VAV units. See Technical brochure – VAV-Compact product range for volumetric flow applications.

Pressure measurement

The integrated differential pressure sensor is also suitable for very small volumetric flows. The maintenance-free sensor technology enables a wide range of applications in the HVAC comfort area such as in residential buildings, offices, hotels, etc.

Actuators

For the various applications and damper designs, various actuator variants with torque 5, 10 or 20 Nm are available to the VAV unit manufacturer.

Control functions

Volumetric flow (VAV/CAV) or position control (Open Loop)

Product features

|	
Application Variable Air Volume (VAV)	Variable air volume control in the V'min...V'max range, demand-dependent via a modulating reference variable (analogue or bus), e.g. room temperature or CO_2 controller for energy-saving air conditioning of individual rooms or zones.
	V'nom, Δp @ V'nom
	Calibration parameters, suitable for the VAV unit or the differential pressure pickup device used
	Adjustment range Δp @ V'nom: 38...500 Pa
	V'max (Max)
	Maximum operating volumetric flow, adjustable 20...100% V'nom
	V'min (Min)
	Minimum operating volumetric flow, adjustable 0...100% V'nom
Application Constant Air Volume (CAV)	Constant volumetric flow control. If required, via step switching (switching contacts) for constant volumetric flow applications.
	Steps: CLOSE / Min / Max / OPEN (Mid)
Application Position Control (Open Loop)	Position control for integration of the VAV-Compact into an external VAV control loop. Transmitter and actuator unit.
	Max
	Range: 20...100 % rotation range
	Min
	Range: 0...100 % rotation range
Demand Controlled Ventilation (DCV)	Output of the demand signal (damper position) to the higher-level automation system – DCV function.
Bus operation	Thanks to its MP-Bus functionality, the VAV-Compact can be easily integrated into a MP-Bus system. The communication interface and MP address is defined using service tools.
	In bus mode, a sensor (0...10 V / passive) can optionally be connected, e.g. a temperature sensor or a switching contact, for integration into the higher-level bus system.

Connection on the MP-Bus

Max. 8 MP-Bus nodes

Connection of active sensors

• Supply AC/DC 24 V
• Output signal 0...10 V (max. 0...32 V)
• Resolution 30 mV

Connection of external switching contact

• Switching current 16 mA @ 24 V
• Start point of the operating range must be parametrised on the MP actuator as ≥0.5 V

Installation notes

Installation situation   Mounting VAV-Compact control equipment:

The VAV-Compact is assembled, set and calibrated on the VAV unit in the factory by the VAV unit manufacturer.

Installation of the VAV unit:

The VAV unit must be installed according to the specifications of the VAV unit manufacturer.

Installation specification Δp sensor:

No restrictions, but it must be avoided that any condensation can run into the sensor and remain there.

Accessibility of control equipment:

Accessibility to the control equipment must be guaranteed at all times.

Pressure tube connections:

The pressure tube connections must not come into contact with liquids or greasing agents of any kind, this includes any residue inside or on the surface of the pressure tubes.

Servicing   Cleaning work during installation, commissioning or maintenance

Belimo VAV devices are maintenance-free. We recommend dry removal of dust from the outside of the housing if necessary.

The duct system and the VAV units are maintained on the occasion of the cleaning intervals required by law or by the specific system. Please observe the following points.

Cleaning work on the damper, differential pressure pickup devices and pressure tubes

When cleaning the duct system or the VAV unit, remove the pressure tubes on the VAV controller so that it will not be affected.

Using compressed air, e.g. blowing out the differential pressure pickup devices or pressure tubes

Before doing this work, disconnect the differential pressure pickup devices or pressure tubes from the differential pressure sensor.

Connecting the pressure tubes

To ensure the correct installation of the pressure tubes, we recommend marking them with + or – before disassembly.
Service

Wireless connection

Belimo devices marked with the NFC logo can be operated with Belimo Assistant 2.

Requirement:

- NFC- or Bluetooth-capable smartphone

- Belimo Assistant 2 (Google Play and Apple AppStore)

Align NFC-capable smartphone on the device so that both NFC antennas are superposed.

Connect Bluetooth-enabled smartphone via the Bluetooth-to-NFC converter ZIP-BT-NFC to the device. Technical data and operating instructions are shown in the ZIP-BT-NFC data sheet.
Wired connection

The device can be parametrised by ZTH EU via the service socket.

For an extended parametrisation, Belimo Assistant 2 can be connected.
